Niagara Falls Blvd Area 5 Tree Survey and Sampling Trip Report LKN 3March2017.docx

Ok, I added some different wording for the final paragraph. Looks like Eric's concerns were also addressed. Take a look and feel free to re-word what I had wrote. I did decide that background reference area soil samples are better to be used than the confirmation soil samples. I don't think we need to discuss nothing further for background wood samples nor background reference soil samples. I think it reads fine without it.

Subject: Please Review Edits to Tree Report

Hello –

I edited the last paragraph in the report (highlighted in yellow). Can you please review and let me know if this makes sense. I am reluctant to discuss the background samples collected outside of Area 5, as this would require **(in my opinion)** additional information and explanation that I do not see necessary for a report that is going to the gentleman that is taking the trees. I intend to go into much more detail, regarding the tree report that will be included in the final NFB report.

Please let me know what you think.

Thank You

Chad
